The growth directions of the Agora Group

THE NEW STRATEGY OF THE AGORA GROUP FOR THE YEARS 2018-2022

AGORA Report 2019

The primary objective of the Company's Management Board is to accelerate the development and increase the scale of operations of the Agora Group. The new strategy of the Agora Group for the years 2018-2022 is based on the following pillars:

		
systematic development of the existing businesses, including through acquisitions strengthening current businesses of the Agora Group	extending the offer of the largest enterprises with innovative products or premium services	development of a new business in prospective market segments

In February 2019, the Company acquired 40% of shares in Eurozet Sp. z o.o., the second largest Polish broadcaster in terms of radio coverage. In October 2019, Agora applied to the President of the Office of Competition and Consumer Protection for consent to acquire the remaining 60% of shares in Eurozet. This transaction may change the Agora Group's position on the radio broadcasters' market and may affect the verification of the Group's investment plans in non-media businesses. At the same time, it is worth noting that this potential transaction does not change the key objectives and strategic goals of the Agora Group. Acceleration of growth and increase in the scale of the Agora Group's activities remains the most important goal, which will be reflected in increased revenue and profitability of the Group.

Taking into account the application for the consent of the President of the Office of Competition and Consumer Protection for the acquisition of 60% of shares in Eurozet Sp. z o.o. and the investments already made in the area of Internet and digital outdoor activities, the Company will engage in a smaller number of new investment projects by 2022.

The cinemas remain the priority development direction of the Agora Group in the area of entertainment in the broad sense. To date, the Company has not been able to find other projects in this area that would provide the Group with an equally satisfactory rate of return, whilst offering good development prospects.

The food business developed within the Helios Group by Foodio Concepts Sp. z o.o. and Step Inside Sp. z o.o. completed the first stage of its operation. At the end of 2019, the first company operated as many as 14 restaurants. The goal for the coming year is to improve their financial efficiency. The second concept - developed under the Pasibus brand name - had 6 operating restaurants at the end of last year. At the beginning of 2020, an investment

AGORA Report 2019

agreement was signed, which will ensure faster development of this promising burger chain.

Another important directions of development in the strategic perspective of the Agora Group until 2022 are digitalization and further development of premium services and products. We are still looking for assets that would complement or strengthen our portfolio in these areas. Examples of such investments include Piano Group Sp. z o.o., the owner of the Move TV platform. With this investment, AMS has taken another step in building its digital media and services offer and strengthened its position in the promising DOOH area.

An example of measures related to the expansion of significant projects of the Group by innovative products or premium services is the continued dynamic development of Yieldbird, the leader in the ad-tech industry, related to the introduction of a product sold in the SaaS (software as a service) model to its offer. Yieldbird has so far achieved global success with its business and continues to grow in foreign markets.

We have also made investments in the B2B solutions segment. In June 2019, we acquired further shares in ROI Hunter, a Czech company, and we hold a 23.9% stake in this entity. ROI Hunter is a provider of a marketing platform which allows companies from the e-commerce industry to promote and sell products via Google and Facebook. In September, we also became the majority shareholder of HR Link Sp. z o.o., one of the fastest growing technology companies in Europe.

The sale of high-quality content in the subscription model remains an important direction of Agora's development. During the current strategic perspective, the Group wants to triple the average number of subscriptions of Gazeta Wyborcza and podcasts of Radio TOK FM, as well as ensure improved monetization of this business model. Ultimately in the year 2022, half of the revenues of Gazeta Wyborcza is to be generated from digital sources and its profitability is expected to improve regularly. The Company is working steadily to achieve this objective. At the end of 2019, the number of digital subscriptions of Gazeta Wyborcza reached a record level of nearly 218 thousand and the share of digital revenues of Gazeta Wyborcza in total revenue of the daily increased to 24.0%. The number of sold subscriptions of Radio TOK FM podcasts has also increased - at the end of December 2019, it reached 20 thousand.
