DOWNSIZING IN THE PRINT SEGMENT OF AGORA GROUP

On 5 March 2019 Agora announced the launch of optimization scheme of its print business. The decision to restructure the business, including the collective redundancies, was caused by continued decline in the revenue from the sales of coldset printing, the dominant technology in Agora Group's Print Segment. This trend is predominantly due to the drop in circulation of printed press, whose publishers are the largest group of clients of the Agora's coldset printing plants. Services commissioned by clients from other market segments, including those executed in the heatset technology, represent a significantly lower share in the Group's income from printing activity; due to infrastructural constraints, they never have been able to offset the dwindling revenues from coldset printing services.

Management Board of Agora resolved to initiate the consultation on group layoffs with the trade unions as well as council of employees of Agora and Agora Poligrafia, and notified relevant employment offices about the intention to deploy group layoffs in Agora S.A. and Agora Poligrafia Sp. z o.o.

Layoffs were carried out between 25 March and 23 April 2019 and affected 47 employees of Agora's print business, which represented 15% of all employees in Print segment of Agora Group (56% of all employees in this area, including 89% of the employees of Agora S.A. plant in Piła and 88% in agora Agora Poligrafia Sp. z o.o. in Tychy, as of 1 March 2019). The same terms were provided to the employees of Tychy and Piła printing plants after 30 June 2019. The employees were also offered protective schemes including assistance in job search and re-training.

In accordance with legal requirements, Agora passed all relevant information, including the downsizing agreement, to the District Employment Office. The process was conducted with due care for the employees' needs and included protective and support measures
