

ADVERTISING AND JOURNALISM ETHICS

In the case of Agora Group, advertising ethics is related to our role as an advertiser as well as media publisher. This renders the issue particularly important for all our operations.

AGORA OBSERVES THE FOLLOWING EXTERNAL CODES OF CONDUCT

Agora Group adopted the following external codes of conduct:

- [Code of Good Practice for Press Publishers](#)
- [Code of Ethics in Advertising](#)

Self-imposed industry regulations are particularly important in Agora's core business, its media operations and responsibility in the advertising segment. Agora is committed to ensuring that the above codes and regulations are upheld to the stakeholders' satisfaction.

We make every effort to ensure that the advertisements we publish comply with the law (including a ban on advertising gambling, alcoholic and tobacco products) and principles of good conduct.

Any advertisement, its form and content, should comply with relevant laws, rules of good conduct, programme line and / or the type of publication and with the codes observed by Agora as a publisher: Code of Ethics in Advertising and Code of Good Practice for Press Publishers.

Additionally, advertisements of higher risk or more sensitive products/industries are reviewed by Agora's Legal Department.

CODE OF ETHICS IN ADVERTISING

Agora has signed Code of Ethics in Advertising - a standard of marketing communication recognized universally across Poland. The Code is a set of principles that should be followed by entrepreneurs, including especially advertisers and other legal and natural persons as well as organizational units without legal personality conducting advertising. The code is based on universally adopted ethical principles and on good practices, in particular on business ethics standards and ethical norms in marketing communication recommended by The European Advertising Standards Alliance (EASA). CODE OF GOOD PRACTICE FOR PRESS PUBLISHERS (PUBLISHERS' CODE)

The code was developed by the Polish Press Publishers Chamber (Izba Wydawców Prasy - IWP) as a set of internal standards for the purpose of self-regulating publishers allied in IWP as well as other publishers that would join the organization in the future. The main idea behind the document is to protect the interests of readers and publishers against unfair market practices that go against recognized good practice code.

STANDARD ADS.TXT

In 2017, Agora was Poland's first publisher, through the Yielbird team, to introduce ads.txt standard. The ads.txt solution, developed by IAB Tech Lab, is the answer to two increasingly more widespread problems in programmatic advertising: domain spoofing and unfair resale of ad space in programmatic open auctions. The project is an example of the online publisher's responsibility as follows relevant recommendations of IAB. [More information](#)
